
3 for 50 Spare Parts Program

50% off pre-owned spare parts

Act now to save on your order of 3 or more pre-owned parts. With over 500 part numbers to choose from, including these best selling product lines:

- ULMA/AccuRay
- System 6, Net90 INFI90, Harmony & Symphony Plus
- Master, MOD & 800xA

Maximize Your Parts Budget

ABB continuously harvests its secure sourcing channels world-wide for unused surplus automation parts, and most parts are inventory buybacks from end-user upgrades where ABB has been doing the service. These parts come from known sources and begin with higher quality base parts only ABB can offer.

Parts are cleaned, tested and repackaged following similar testing procedures as refurbished parts. These genuine OEM parts are priced competitively to the surplus market for sub-stantial savings, less than half that of new parts. Pre-owned parts also include a risk-free 24-month warranty.

Order Using Code 3450

Call to check for available pre-owned parts and mention order code 3450. Our friendly and knowledgeable customer service team are happy to help you find the right parts for your auto-mation system.

Call 1-800 435 7365 option 2, option 2. Or email partservices@us.abb.com

Limited quantities available. Subject to prior sale.

3 for 50 Spare Parts Program

Save 50% on 3 or more pre-owned spare parts

Limited quantities available. Subject to prior sale.

Additional information

We reserve the right to make technical changes or modify the contents of this document without prior notice. With regard to purchase orders, the agreed particulars shall prevail. ABB AG does not accept any responsibility whatsoever for potential errors or possible lack of information in this document.

We reserve all rights in this document and in the subject matter and illustrations contained therein. Any reproduction, disclosure to third parties or utilization of its contents – in whole or in parts – is forbidden without prior written consent of ABB AG.

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry, no matter how small, should be recorded to ensure the integrity of the financial statements. This includes not only sales and purchases but also expenses, income, and transfers. The text suggests that a systematic approach to record-keeping is essential for identifying trends and potential areas of concern.

In the second section, the author addresses the challenges of reconciling accounts. It is noted that discrepancies often arise due to timing differences or errors in data entry. The recommended solution is to perform regular reconciliations and to investigate any variances immediately. This process helps in identifying the source of the error and correcting it before it leads to more significant issues.

The third part of the document focuses on the role of internal controls. It argues that a strong internal control system is crucial for preventing fraud and ensuring the accuracy of financial reporting. Key elements of such a system include segregation of duties, authorization procedures, and regular audits. The text provides examples of how these controls can be implemented in a small business setting.

Finally, the document concludes by highlighting the importance of transparency and communication. It encourages business owners to be open about their financial performance and to provide clear explanations for any significant changes. This not only builds trust with stakeholders but also helps in making informed decisions about the future of the business.
